Construction Project Briefing

January 15, 2020

Today's Presentation

- ELMI East Lake, Milwaukee, Illinois Substation Upgrade
- Your New Blue Signals Project
- Lake Line and South Mainline Track Improvements (Fast Tracks Program)
- Ravenswood Line Ballasted Track Improvements (Fast Tracks Program)
- Electric Bus En Route Charger Stations
- Grand, Chicago & Division Renovations (Blue Line)
- Red and Purple Modernization Project

| Justification of Need: | The existing traction power equipment at these substations is well past its useful life and needs to be replaced to assure reliable 600-volt DC traction power. Rehabilitate the substation buildings to a state of good repair. |
|---|--|
| Priority of Project: | High |
| Total Project Budget: | \$ 69M |
| Construction Contract Value: | \$ 42.9M |
| Earned to Date: | 88% |
| Percent Change Orders to Construction Contract: | 0 |
| Percent Time Used: | 95% |
| DBE: | Goal: 20% / Commitment: 20% Contract is on track to meet the DBE goal Outreach events conducted: 2 (CTA) |

| Estimated Start Date/Estimated Length of Project: | NTP: April 10, 2017; Substantial Completion March 8, 2020 |
| Designer of Record: | T.Y. Lin International |
| Construction Manager/General Contractor: | STV |

Detailed Overview of Scope:

Rehabilitation of existing buildings and building envelopes to a state of good repair at East Lake, Milwaukee, and Illinois. Scope of work includes replacement of roof, tuck-pointing, hazardous material abatement, structural repairs and improvements, plumbing and mechanical repairs and improvements, and electrical repairs and improvements.

Replace existing AC/DC conversion equipment at all locations and getaway cables at East Lake.

Part of the scope of this project includes CTA purchasing 10 East Lake from ComEd.

| Impact on Customers: | There will be minimum impact to CTA customers. |
|------------------------------|---|
| Benefit to System: | Additional traction power capacity Reduced traction power related train defects Improved reliability for revenue service Improved safety |
| Benefit to Community: | Improved Reliability and Safety |
| Impact on Accessibility: | None |
| Estimated # of Jobs Created: | 897 indirect, 188 direct |
| Customer Communication Need: | Construction activity notices will be provided to inform businesses and residents regarding temporary construction impacts (noise, dust, street/alley closures) throughout the project. |

N/A

| Justification of Need: | The existing 30-year old signal system is approaching the end of its useful life. Maintaining the system has become increasingly difficult in as much as many components are now obsolete and difficult to repair or replace. |
|---|---|
| Priority of Project: | High |
| Total Project Budget: | \$ 207M |
| Construction Contract Value: | \$ 153,696,433.00 |
| Earned to Date: | 35% |
| Percent Change Orders to Construction Contract: | 0 |
| Percent Time Used: | 57% |
| DBE: | Goal: 10% Design / 15% Construction Commitment: 10.1% Design / 15% Construction Contract is on track to meet the DBE goal Outreach events conducted: 2 (CTA) 1 (KAJV) |
| Funding Source: | CTA Bonds, RTA Bonds, Federal Formula Funds, and Federal TIFIA loan |
| Estimated Start Date/Estimated Length of Project: | NTP: May 21, 2018; Substantial Completion May 20, 2021 |
| Designer of Record: | KAJV – Mott McDonald |
| Construction Manager/General Contractor: | STV |

Detailed Overview of Scope:

This is a design-build project that existing relay houses are going to be replaced with new relay houses on elevated or at grade platforms and existing relay rooms are proposed to be expanded/ refurbished and/or reconfigured to accommodate the new signal equipment. The existing relay houses/ rooms are located at the following locations: Jefferson Park, Central, Foster, Nagle, Harlem, Cumberland, River Road, Rosemont East, Rosemont Yard, Rosemont West, Old Manheim, O'Hare East and O'Hare West. Special trackwork improvements are at Central Interlocking.

| Impact on Customers: | There will be 11 weekend Line Cuts: 2 – 9 Day Line Cuts from O'Hare to Rosemont, 2 Weekend Line Cuts from Rosemont to Harlem, and 7 Line Cuts from Harlem to Jefferson Park. Bus shuttles will be provided for these line cuts. In addition, there are 90 nighttime single track outages that may affect customers. |
|------------------------------|--|
| Benefit to System: | This will be the last section of the Blue Line to receive upgraded signals and interlocking systems. When completed, these systems will assure consistent, safe and reliable train operations on the entire Blue Line for many years to come. The proposed new equipment will provide bi-directional railway traffic protection and maintain headways at 90 seconds at 35 mph nominal. The Project will be designed with infrastructure provisions for a future Communication Based Train Control (CBTC) system, such as ducts for serial fiber/ cables, ample spare room for hardware in each relay/ audio house and ideal locations for transponders, radio transmitters/ antennae and wayside zone controllers. |
| Benefit to Community: | Improved Reliability and Safety |
| Impact on Accessibility: | During the 11 weekend Line Cuts, train stations will be inaccessible. |
| Estimated # of Jobs Created: | TBD |
| Customer Communication Need: | Construction activity notices will be provided to inform customers that Line Cuts will impact their commute. |

Delay Explanation:

N/A

| Justification of Need: | The goal of this project is to replace worn and deteriorated track components to improve the quality of ride for customers, reduce maintenance, eliminate slow zones, and extend the life of the infrastructure in the project area. |
|---|--|
| Priority of Project: | High |
| Total Project Budget: | \$70 million |
| Construction Contract Value: | \$41,448,861 |
| Earned to Date: | 100% (through end of December) |
| Percent Change Orders to Construction Contract: | 0% |
| Percent Time Used: | 100% (through end of December) |
| DBE: | Goal: 22% Design / 22% Construction Commitment: 22% Design / 22% Construction Contract is on track to meet the DBE goal |
| Funding Source: | City rideshare fee |
| Estimated Start Date/Estimated Length of Project: | NTP: April 5, 2019 Projected Substantial Completion: December 31, 2019 (ahead of schedule) Contractual Substantial Completion: November 29, 2020 |
| Designer of Record: | Alfred Benesch & Company |
| Construction Manager / General Contractor: | STV Incorporated / Kiewit Infrastructure Company |

Detailed Overview of Scope:

Project Limits: Lake Line - Wells Street to Ogden Avenue, South Mainline - 18th Street to 30th Street

Scope: The base scope includes both design and construction services to replace track ties and fasteners, replace footwalks, replace running rail and contact rail in selective curve areas, add track planking in the gauge of the mainline tracks in select areas, and perform incidental signal work and testing. The contract also includes rail grinding work within the project limits to improve the rail head profile and a survey of the entire Green Line to assist with developing future Green Line projects.

| Impact on Customers: | Construction work will occur during 16 weekend line cuts between May-December 2019. 8 weekend line cuts will occur on the Lake Line between the following stations: 1 line cut between California and Clark/Lake stations 3 line cuts between Ashland and Clinton stations 3 line cuts between Ashland and Clark/Lake stations 1 line cut between Clinton and Clark/Lake stations 8 line cuts will occur on the South Mainline between Roosevelt and 35th-Bronzeville-IIT stations. Bus shuttles for passengers will be provided between stations for all weekend line cuts. |
|------------------------------|---|
| Benefit to System: | The project will remove 14,753 ft. of slow zones that currently exist in the project area. The project will reduce maintenance needs and extend the life of the track infrastructure in the project area. |
| Benefit to Community: | When completed, the project is expected to provide 5 minute round trip travel time savings and improve ride quality for Green Line passengers. |
| Impact on Accessibility: | None |
| Estimated # of Jobs Created: | 910 total, 190 direct |
| Customer Communication Need: | Construction activity notices will be provided to inform customers and local businesses/residents how line cuts and road closures will impact them. |

| | | |

| Delay Explanation: | |
|--------------------|--|
| N/A | |

| Justification of Need: | The planned improvements for the Fast Tracks Program will reduce the time of typical round-trip commutes on the Red, Blue, Brown and Green lines by upgrading track and electrical power in multiple locations throughout the system. This project will address the Ravenswood Line – Ballasted Track Improvements project. This project will replace components that have been in service since 1991. |
|---|---|
| Priority of Project: | High |
| Total Project Budget: | \$ 16.4M |
| Construction Contract Value: | \$ 10.6 |
| Earned to Date: | 30% |
| Percent Change Orders to Construction Contract: | 0 |
| Percent Time Used: | 100% |
| DBE: | Goal: 20% Commitment: 20% Contract is on track to meet the DBE goal Outreach events conducted: 2 (CTA) |
| Funding Source: | CTA Bonds |
| Estimated Start Date/Estimated Length of Project: | NTP: July 7, 2019; Substantial Completion January 6, 2020 |
| Designer of Record: | CTA |
| Construction Manager/General Contractor: | WSP/ F.H. Paschen |

Detailed Overview of Scope:

The general Scope of Work includes, but is not limited to, replacement of grade crossings, at Kedzie and Francisco/Manor also the replacement of ties, rail fasteners, stone ballast, select running rail and incidental signal and traction power work. At stations between Western Ave and Kimball.

| Impact on Customers: | There will be some impact to CTA customers and surrounding community related to pedestrian and vehicular detours for track and crossing replacements Bus Shuttles will be provided throughout construction. | |
|------------------------------|--|--|
| Benefit to System: | Reduces the typical round trip commute times. Upgraded track and electrical power in multiple locations. Improved reliability for revenue service. Improved safety. | |
| Benefit to Community: | Improved Reliability, Travel Times and Safety. | |
| Impact on Accessibility: | None | |
| Estimated # of Jobs Created: | 45 Direct and 216 Indirect | |
| Customer Communication Need: | Construction activity notices will be provided to inform businesses and residents regarding temporary construction impacts (noise, dust, street/alley closures) throughout the project. | |

| DBE: | Goal: 30% Commitment: 30% Contract is on track to meet the DBE goal Outreach events conducted: 1(Mortenson) |
| Funding Source: | FTA, CTA Bond, Grants CMAQ |
| Estimated Start Date/Estimated Length of Project: | NTP: 7-12-2018 Projected Substantial Completion: 4-15-2020 Contractual Substantial Completion: 12-14-2019 |
| Designer of Record: | JLK Architects |
| Construction Manager / General Contractor: | CM = WSP/SQN GC = Proterra / Mortenson |

Detailed Overview of Scope:

The Contractor will provide design, construction services, vehicle delivery, and equipment installation services to the CTA for a complete charging infrastructure system for 100% electric propulsion buses at the Navy Pier Bus Turnaround, the Chicago & Austin Bus Turnaround, and the Chicago Garage.

| Impact on Customers: | This work will have minimal impact on CTA customers at Navy Pier, and Chicago & Austin Bus Turnaround. There will be a lane closure at the Grand Ave. / Park Ave. intersection during the tie in to the ComEd vault for power later in Q4. |
|------------------------------|---|
| Benefit to System: | The City of Chicago has committed to "Going Green". Electric buses reduce the strain on the environmental hazards of traditional combustion engines. |
| Benefit to Community: | Clean, quiet, well lit buses promote green living. |
| Impact on Accessibility: | N/A |
| Estimated # of Jobs Created: | 100 |
| Customer Communication Need: | Construction activity notices will be provided to inform customers and local businesses/residents how the lane closures will impact them. |

| Funding Source: | CTA Bonds, RTA Bonds, IDOT, TIFIA, TIF |
| Estimated Start Date/Estimated Length of Project: | NTP: September 27, 2018 Projected Substantial Completion: March 18, 2020 Contractual Substantial Completion: March 18, 2020 |
| Designer of Record: | Mueller & Mueller |
| Construction Manager / General Contractor: | WSP |

Detailed Overview of Scope: The Grand, Chicago, and Division Blue Line Stations will be brought to a state of good repair. Scope of work includes electrical and lighting upgrades, floor and wall replacements, sidewalk repair, updated signage, stair repairs, water mitigation, and improved customer amenities.

| Impact on Customers: | 9 Total Weekend Station Closures (3 at each station). Stairways will be taken out of service, sequentially, for 42 days each. 9 Weekend Single Tracks. 60 Nightly Single Tracks. Longitudinal Partial Platform Closures: 2 at each station (8 total) for a duration of 3-4 weeks each. |
|------------------------------|--|
| Benefit to System: | Extensive renovations to all three stations. |
| Benefit to Community: | Improved reliability, and safety |
| Impact on Accessibility: | No impact |
| Estimated # of Jobs Created: | 507 indirect, 106 direct |
| Customer Communication Need: | Construction activity notices and customer notices will be needed to alert customers, businesses and residents to weekend and night work occurrences. Extensive communication will be required for weekend closures and extended partial platform closures. |

Project Title: Grand, Chicago & Division Renovations (Blue Line)

| Justification of Need: | The RPM Phase One Project is greatly needed in order to expand capacity on CTA's most utilized rail line and to replace aging infrastructure. |
|---|---|
| Priority of Project: | High |
| Total Project Budget: | \$2.1 Billion (excludes Transit TIF interest payments) |
| Contract Value: | \$1,272,275,929 |
| Earned to Date: | 12% |
| Percent Change Orders to Construction Contract: | 0% |
| Percent Time Used: | 15% |
| DBE: | Design Goal: 20% / Commitment: 20.64% Construction Goal: 20% / Commitment 20% Contract is on track to meet the DBE goal |
| Funding Source: | CTA Financing, FTA Core Capacity Grant, CMAQ, TIFs |
| NTP / Construction Start / Estimated Completion | February 8, 2019 / October 2019 / 2025 |
| Design Build Contractor: | Walsh-Fluor Design-Build Team |
| Owners Representative: | Elevated Solutions Partners |

Detailed Overview of Scope:

RPM Phase One consists of the following elements that will allow CTA to expand service along the Red and Purple lines:

- Lawrence to Bryn Mawr Modernization (LBMM) complete reconstruction and addition of ADA accessibility at four Red Line stations (Lawrence, Argyle, Berwyn, and Bryn Mawr) and reconstruction of 6 miles of track, structures, and viaducts from Leland Ave. to Ardmore Ave.
- Red-Purple Bypass (RPB) Construction of a grade-separated bypass for the Brown Line at Clark Junction, just north of Belmont Ave.
 Includes realignment and reconstruction of 1.4 miles of mainline tracks and structure between Belmont station and south of Cornelia Ave.
- Corridor Signal Improvements (CSI) Installation of new higher-capacity signal system on 23 miles of track between Belmont and Howard stations.

| Impact on Customers: | Track closures and temporary station closures during construction. Temporary relocation of bus stops and bus reroutes during construction phasing. Temporary sidewalk, traffic lane, and parking lane closures during construction phasing. |
|------------------------------|---|
| Benefit to System: | The Red-Purple Bypass will allow CTA to operate more trains and reduce delays at the Clark Junction. Signal improvements will reduce customer congestion by allowing for additional trains. 100 year old structures are being replaced to improve reliability and extend life of system. Four new, larger, ADA accessible stations with wider platforms will replace current 90+ year old facilities. |
| Benefit to Community: | Improved pedestrian safety around new modern stations and structures. Enhanced lighting, improved street clearance, removal of columns from streets, enhanced signage, improved areas under track structures, and new station entrance at Hollywood Avenue. |
| Impact on Accessibility: | Upon project completion, Lawrence, Argyle, Berwyn and Bryn Mawr stations will include elevator access and other ADA access improvements throughout. Station improvements include wider platforms, better lighting, and modern accessible amenities. |
| Estimated # of Jobs Created: | 1,400+ and counting |
| Customer Communication Need: | Frequent communication is required to provide customers advance and real-time information regarding rail and bus service modifications due to construction. |
