

October 2015 Performance Metrics

The purpose of CTA's monthly performance metrics is to set internal goals for agency performance to encourage improvement and establish accountability. Below is information that may be helpful in understanding the metrics for the month of October, including progress that has been made in several metrics. All boxes in green demonstrate that CTA met or exceeded its monthly target and yellow boxes mean that the CTA came within 10% of the monthly performance target. An explanation for the targets missed by more than 10%, indicated by a red colored box, is provided below.

In October, the CTA met, exceeded or came within 10% of the agency's monthly internal targets in nearly all categories – including:

- Rail Ridership;
- Bus Ridership;
- Total Ridership;
- Percentage of Big Gap Intervals in Bus;
- Mean Miles Between Reported Rail and Bus Vehicle Defects;
- Average Daily Percent of Rail Fleet Availability;
- Average Daily Percent of Bus Fleet Availability;
- Average Interior Rail and Bus Clean Inspection scores; and others.

The Percent of Bunched Intervals in Bus missed its target in October, affected by reroutes related to construction and traffic congestion. Rail Delays of 10 Minutes or More missed its target for the month due mostly to rail system improvement and construction project work, as well as special events such as scheduled bridge lifts by the Chicago Department of Transportation.
