# Construction Project Briefing

August 14, 2019

# **Today's Presentation**

- ELMI East Lake, Milwaukee, Illinois Substation Upgrade
- Your New Blue Signals Project
- Belmont and Jefferson Park Station Improvements (Blue Line)
- Lake Line and South Mainline Track Improvements (Fast Tracks Program)
- 95<sup>th</sup> Street Terminal Improvement Program
- Electric Bus En Route Charger Stations
- Red and Purple Modernization Project

Justification of Need:	The existing traction power equipment at these substations is well past its useful life and needs to be replaced to assure reliable 600-volt DC traction power. Rehabilitate the substation buildings to a state of good repair.
Priority of Project:	High
Total Project Budget:	\$ 69M
Construction Contract Value:	\$ 42.9M
Earned to Date:	71%
Percent Change Orders to Construction Contract:	0
Percent Time Used:	79%
DBE:	Goal: 20% / Commitment: 20%  Contract is on track to meet the DBE goal  Outreach events conducted: 2 (CTA)
Funding Source:	CTA Bonds, RTA Bonds
Estimated Start Date/Estimated Length of Project:	NTP: April 10, 2017; Substantial Completion March 8, 2020
Designer of Record:	T.Y. Lin International
Construction Manager/General Contractor:	STV

#### **Detailed Overview of Scope:**

Rehabilitation of existing buildings and building envelopes to a state of good repair at East Lake, Milwaukee, and Illinois. Scope of work includes replacement of roof, tuck-pointing, hazardous material abatement, structural repairs and improvements, plumbing and mechanical repairs and improvements, and electrical repairs and improvements.

Replace existing AC/DC conversion equipment at all locations and getaway cables at East Lake.

Part of the scope of this project includes CTA purchasing 10 East Lake from ComEd.

Impact on Customers:	There will be minimum impact to CTA customers.		
Benefit to System:	<ul> <li>Additional traction power capacity</li> <li>Reduced traction power related train defects</li> <li>Improved reliability for revenue service</li> <li>Improved safety</li> </ul>		
Benefit to Community:	Improved Reliability and Safety		
Impact on Accessibility:	None		
Estimated # of Jobs Created:	897 indirect, 188 direct		
Customer Communication Need:	Construction activity notices will be provided to inform businesses and residents regarding temporary construction impacts (noise, dust, street/alley closures) throughout the project.

	Transformer #4, Bus Duct #4, and Rectifier #4 Put In-Service.	Completed
	Installation, Testing, and Putting In-Service DC Switchgear.	Ongoing
	Transformer #3, Bus Duct #3, and Rectifier #3 have been delivered - scheduled to be in service by mid August.	Ongoing
	Manufacturing of traction power equipment is in progress at East Lake Substation.	Ongoing
	Factory Acceptance Testing of traction power equipment at East Lake Substation is progressing.	Ongoing
	Tuckpointing, demolition, lead paint abatement, epoxy floor installation, di-electric floor installation, exhaust fan installation, plumbing are in progress at East Lake Substation.	Ongoing

De	lav	Exp	lan	atic	n:

N/A

Justification of Need:	The existing 30-year old signal system is approaching the end of its useful life.  Maintaining the system has become increasingly difficult in as much as many components are now obsolete and difficult to repair or replace.
Priority of Project:	High
Total Project Budget:	\$ 207M
Construction Contract Value:	\$ 153,696,433.00
Earned to Date:	19%
Percent Change Orders to Construction Contract:	0
Percent Time Used:	40%
DBE:	Goal: 10% Design / 15% Construction Commitment: 10.1% Design / 15% Construction Contract is on track to meet the DBE goal Outreach events conducted: 2 (CTA) 1 (KAJV)
Funding Source:	CTA Bonds, RTA Bonds, Federal Formula Funds, and Federal TIFIA loan
Estimated Start Date/Estimated Length of Project:	NTP: May 21, 2018; Substantial Completion May 20, 2021
Designer of Record:	KAJV – Mott McDonald
Construction Manager/General Contractor:	STV

#### **Detailed Overview of Scope:**

This is a design-build project that existing relay houses are going to be replaced with new relay houses on elevated or at grade platforms and existing relay rooms are proposed to be expanded/ refurbished and/or reconfigured to accommodate the new signal equipment. The existing relay houses/ rooms are located at the following locations: Jefferson Park, Central, Foster, Nagle, Harlem, Cumberland, River Road, Rosemont East, Rosemont Yard, Rosemont West, Old Manheim, O'Hare East and O'Hare West. Special trackwork improvements are at Central Interlocking.

Impact on Customers:	There will be 11 weekend Line Cuts: 2 – 9 Day Line Cuts from O'Hare to Rosemont, 2 Weekend Line Cuts from Rosemont to Harlem, and 7 Line Cuts from Harlem to Jefferson Park. Bus shuttles will be provided for these line cuts. In addition, there are 90 nighttime single track outages that may affect customers.
Benefit to System:	This will be the last section of the Blue Line to receive upgraded signals and interlocking systems. When completed, these systems will assure consistent, safe and reliable train operations on the entire Blue Line for many years to come. The proposed new equipment will provide bi-directional railway traffic protection and maintain headways at 90 seconds at 35 mph nominal. The Project will be designed with infrastructure provisions for a future Communication Based Train Control (CBTC) system, such as ducts for serial fiber/ cables, ample spare room for hardware in each relay/ audio house and ideal locations for transponders, radio transmitters/ antennae and wayside zone controllers.
Benefit to Community:	Improved Reliability and Safety
Impact on Accessibility:	During the 11 weekend Line Cuts, train stations will be inaccessible.
Estimated # of Jobs Created:	TBD
Customer Communication Need:	Construction activity notices will be provided to inform customers that Line Cuts will impact their commute.

**Conduit Installation** 

Track Removal and Excavation

Justification of Need:	Most elements of the Belmont and Jefferson Park Stations have not experience major renovation or updating since being built in 1970. In order to bring both stations to a state of good repair, upgrades are required. In addition, Jefferson Park Bus Terminal will be brought up to current ADA standards.		
Priority of Project:	High		
Total Project Budget:	\$ 42.2 M		
Construction Contract Value:	\$ 30.8 M		
Earned to Date:	95%		
Percent Change Orders to Construction Contract:	0		
Percent Time Used:	100%		
DBE:	Goal: 30% / Commitment: 30% / Projected Attainment*: 30% Contract is on track to meet the DBE goal Outreach events conducted: 2 (CTA HQ and Community First Hospital)		
Funding Source:	CTA PBV, CTA Bonds, RTA Bonds, IDOT, FTA, TIF, TIFIA		
Start Date/Length of Project:	NTP: October 16, 2017; Substantial completion Belmont & Jefferson Park Rail Stations: December 31, 2018; Substantial completion Belmont Bus turnaround and canopy; 1st quarter 2019; and Substantial completion Jefferson Park Bus Terminal: July 2019		
Designer of Record:	EXP		
Construction Manager/General Contractor:	WSP (formerly Parsons Brinckerhoff/) Walsh Construction		

**Overview of Scope:** Both the Belmont and Jefferson Park Stations will be brought to a state of good repair. Scope of work includes electrical and lighting upgrades, floor replacements, sidewalk repair, updated signage, wall repairs, water mitigation, and improved customer amenities. Belmont will also receive a Gateway Canopy element that will invoke a sense of community and protect customers from the elements. Jefferson Park Bus terminal will be brought to current ADA standards via larger bus islands, improved lighting and signage, and repaired pavement and sidewalks.

Impact on Customers:	<ul> <li>8 Weekend Station Closures at Belmont.</li> <li>Belmont Bus Turnaround Closed up to 90 Days for Construction.</li> <li>8 Weekend Single Tracks.</li> <li>45 Nightly Single Tracks.</li> <li>Longitudinal Partial Platform Closures: 3 weeks each side at Belmont and Jefferson Park.</li> <li>One half of Jefferson Park Bus Terminal Closed at a time (Bus stops temporarily relocated) during terminal construction.</li> </ul>
Benefit to System:	Extensive renovations to both stations. Jefferson Park Bus Terminal will meet current ADA standards.
Benefit to Community:	Improved reliability, safety and accessibility.
Impact on Accessibility:	Improves accessibility in the Jefferson Park Bus Terminal.
Estimated # of Jobs Created:	546 indirect, 114 direct
Customer Communication Need:	Construction activity notices and customer notices will be needed to alert customers, businesses and residents to weekend and night work occurrences. Extensive communication will be required for weekend closures, extended partial platform closures, and bus terminal closures.

Designer of Record:	Alfred Benesch & Company
Construction Manager / General Contractor:	STV Incorporated / Kiewit Infrastructure Company

#### **Detailed Overview of Scope:**

Project Limits: Lake Line - Wells Street to Ogden Avenue, South Mainline - 18th Street to 30th Street

Scope: The base scope includes both design and construction services to replace track ties and fasteners, replace footwalks, replace running rail and contact rail in selective curve areas, add track planking in the gauge of the mainline tracks in select areas, and perform incidental signal work and testing. The contract also includes rail grinding work within the project limits to improve the rail head profile and a survey of the entire Green Line to assist with developing future Green Line projects.

Impact on Customers:	<ul> <li>Construction work will occur during 15 weekend line cuts between May-December 2019.</li> <li>8 weekend line cuts will occur on the Lake Line between the following stations: <ul> <li>1 line cut between the California and Clark/Lake stations</li> <li>1 line cut between the Ashland and Morgan stations</li> <li>2 line cuts between the Ashland and Clinton stations</li> <li>2 line cuts between the Morgan and Clark/Lake stations</li> <li>2 line cuts between the Clinton and Clark/Lake stations</li> </ul> </li> <li>7 line cuts will occur on the South Mainline between the Roosevelt and 35th-Bronzeville-IIT stations.</li> <li>Bus shuttles for passengers will be provided between stations for all weekend line cuts.</li> </ul>	
Benefit to System:	<ul> <li>The project will remove 14,753 ft. of slow zones that currently exist in the project area.</li> <li>The project will reduce maintenance needs and extend the life of the track infrastructure in the project area.</li> </ul>	
Benefit to Community:	When completed, the project is expected to provide 5 minute round trip travel time savings and improve ride quality for Green Line passengers.	
Impact on Accessibility:	None	
Estimated # of Jobs Created:	910 total, 190 direct	
Customer Communication Need:	Construction activity notices will be provided to inform customers and local businesses/residents how line cuts and road closures will impact them.

Funding Source:	Federal, State, Bond

Estimated Start Date/Estimated Length of Project:	Main Terminal Contract: NTP: Nov 24, 2015; South Terminal – operational April 14, 2018. North Terminal – Terminal operational December 31, 2018.
AP1/AP2 Construction Manager/General Contractor:	Walsh / II in One JV
Main Terminal Contractor:	F.H. Paschen / Milhouse JV
Owners Representative:	Jacobs/SQN JV

#### **Detailed Overview of Scope:**

The 95thTerminal Improvement Project will create new South and North terminal buildings at 95th on the Dan Ryan Red Line. The new terminal buildings will create a functional and efficient intermodal facility to enhance bus service and improve pedestrian safety. Scope includes the replacement and expansion of the terminal and platform and the addition of bus and pedestrian bridges. New administrative office space will be built and new bus bays will be provided around the terminal buildings.

Impact on Customers:	Track closures and weekend station closures during construction. Temporary relocation of certain bus operations to nearby streets during construction phasing.
Benefit to System:	Improved customer circulation and safety by relieving congestion. Improved bus service and improved pedestrian safety.
Benefit to Community:	Improved pedestrian safety with new pedestrian bridge over 95 <sup>th</sup> Street, longer train platform extending to the new South Terminal Building.
Impact on Accessibility:	New south and north terminal buildings with improved accessible routes to buses.
Estimated # of Jobs Created:	3,640 indirect, 762 direct
Customer Communication Need:	Requires periodic track closures and possible station closures with bus shuttle service. Bus Operations may be relocated to adjacent streets during certain phases of construction.

#### **Project Title: Electric Bus En Route Charger Stations**

Justification of Need:	
Priority of Project:	Normal
Total Project Budget:	\$31.9M
Construction Contract Value:	(\$13,934,337.00 Infrastructure Installation) – (\$18,012,857.00 Bus Procurement)
Earned to Date:	9.5%
Percent Change Orders to Construction Contract:	0%
Percent Time Used:	70%
DBE:	Goal: 30%     Commitment: 30%
Funding Source:	FTA, CTA Bond, Grants CMAQ
Estimated Start Date/Estimated Length of Project:	<ul> <li>NTP: 7-12-2018</li> <li>Projected Substantial Completion: 3-14-2020</li> <li>Contractual Substantial Completion: 12-14-2019</li> </ul>
Designer of Record:	JLK Architects
Construction Manager / General Contractor:	CM = WSP/SQN GC = Proterra / Mortenson

#### Detailed Overview of Scope:

The Contractor will provide design, construction services, vehicle delivery, and equipment installation services to the CTA for a complete charging infrastructure system for 100% electric propulsion buses at the Navy Pier Bus Turnaround, the Chicago & Austin Bus Turnaround, and the Chicago Garage.

## **Project Title: Electric Bus En Route Charger Stations**

Impact on Customers:	<ul> <li>This work will have minimal impact on CTA customers at Navy Pier, and Chicago &amp; Austin Bus Turnaround.</li> <li>There will be a lane closure at the Grand Ave. / Park Ave. intersection during the tie in to the ComEd vault for power later in Q4.</li> </ul>
Benefit to System:	The City of Chicago has committed to "Going Green". Electric buses reduce the strain on the environmental hazards of traditional combustion engines.
Benefit to Community:	Clean, quiet, well lit buses promote green living.
Impact on Accessibility:	N/A
Estimated # of Jobs Created:	100
Customer Communication Need:	Construction activity notices will be provided to inform customers and local businesses/residents how the lane closures will impact them.
