Things you should know

- Riders who are 14 years old or older may bring a bicycle on a train or bus; 12-13 year-olds must be with an adult. Children under 12 may not bring bicycles on CTA.
- Many CTA rail stations have indoor bike parking and almost all have racks outside or close by.
- Cyclists assume all responsibility for any damage and/or injury that occurs as a result of their bicycle being on CTA property. This includes injury to the cyclist or others. A sudden stop or other incident does not remove responsibility from the bicycle owner for damages or injuries, so always be with your bike and in control, holding it in place and be prepared for the potential of a sudden stop.
- Folding bicycles are allowed inside buses and trains at full fare.
- Fuel/gas-powered bicycles of every kind are prohibited on the CTA.
- Divvy and other public bikeshare bikes and scooters are not permitted on CTA buses or trains (or in the fare-paid areas of CTA stations).
- Never, ever ride your bike or other micromobility device in an ‘L’ station. Any mistake can lead to you injuring another person or ending up on the tracks—possibly injured and unable to get back up! Trains enter stations faster than you think and the rails are always electrified!

Scooters

- Divvy bikes, e-bikes are available through much of Chicago and Evanston as an option for when you don’t have or want to bring your own bike and are limited-use/disposable tickets (Single-trip, 1-Day, etc.).
- Vending machines in every CTA ‘L’ station sell new Ventra Cards and also limited-use/disposable tickets (Single-trip, 1-Day, etc.).
- New plastic ventra cards cost $5.
- New plastic cards from vending machines, regular per-ride fares also valid when using contactless e-bikes safely. Follow driver advice.
- Personal e-bikes and scooters are welcome on CTA, but you may not bring commercially-owned (bikeshare/scooter-share) bikes or scooters on our system. This includes Divvy bikes, which may not be brought on CTA buses or trains. Note that bus bicycle racks are not permitted on CTA buses or trains (or in the fare-paid areas of CTA stations).
- Additional micromobility options exist that can help connect you with our services, including e-scooters through Divvy new providers who offer those services.

Intro/bikes on trains

Like to Bike?

Transit and cycling go great together—and we’re here to help make city cycling easier! This guide is here to help you get on board with your bike on CTA’s L trains and buses—whether you bring your bike with you as part of a commute, you’re biking to work and the weather turns or just want to bring your bike across town for a weekend bike ride somewhere new.

Bikes on ‘L’ trains

Bicycles are permitted on all CTA’s ‘L’ trains most hours on weekdays (except during rush periods, from 7-9am and 4-6pm)—and all day on Saturdays, Sundays and holidays. If you board outside of rush hour restriction times and your ride extends into these hours, you’ll be allowed to finish your ride.

Important: Divvy and other bikeshare bikes are not allowed on CTA. Also, during busy periods, staff on the train or in the station may ask that you wait until trains become less crowded before boarding. We also sometimes prohibit bicycles on a line—or the entire ‘L’ system—during periods where we expect heavy ridership, to ensure everyone’s safety. Check for alerts online or in stations before you travel.

When entering a train station, use a wide turnstile gate that swings open if there’s one available. Otherwise, station staff can open a manual access gate to let you in once you’ve paid a fare.

a. Do not attempt to carry your bicycle through tall, rotating metal barrier gates (“rotogates”): It will get caught!
b. Note that we don’t allow people to exit at the King Drive Green Line station since it only has rotogates for outbound exiting—simply stay on until Cottage Grove if you’re wishing to reach the area.

To reach platform level, please use elevators whenever they’re available. Otherwise, carry your bicycle on ramps and stairways and be sure to allow others to pass before you go up or down. Bicycles are not permitted on escalators.

When a train is approaching or leaving, stay well clear of the platform edge. If a train is crowded, please wait for the next one for the safety and comfort of others.

Before boarding, check to see if other cyclists are present—only two bicycles are allowed per railcar.

Once on board, stand with your bike in either end of the railcar or, if not in use, you can flip up the seat in a railcar’s wheelchair area(s) to make sure other people can stand or move around the car comfortably. Just be sure to yield this space if it’s needed by a rider with a disability or someone who needs priority seating.

Tips:

When bringing a bike on the train, look for the green bicycle decal next to one of the sets of doors on your train stops—there is typically more space for bikes at that half of the car. Remember: Though we may sometimes need to ask that you not bring your bike on the train during crowded times, crowding restrictions don’t apply to using the racks on buses.

We encourage you to know your alternatives in the event of crowding and consider the bus system as your backup plan if ever you can’t fit safely on trains.

Stand with your bicycle kickstand inside stations or rail cars. Do not attempt to carry your bicycle in your arms, or let it hang loosely with you onto the bus. (Photo D).

Remove bags or other hanging items from your bike, including panniers, before the bus arrives. (You’ll need to bring your bags or any other items that might come loose with you onto the bus.)

Alert the bus operator that you’ll be loading your bicycle. If you’re the first person to load a bike onto the bus, you’ll need lower the rack by squeezing the center handle (Photo A).

Lift your bicycle so it sits in the empty wheel well closest to the face of the bus. If yours is the first to be loaded, do so with your front wheel facing the curb since this is where the support arm is. (If yours is the second, your front wheel should face away from the curb).

Pull the spring-loaded support arm out and then upwards (Photo B), to pull it completely over the top of your front wheel and nestle it where the wheel meets the wheel fork to help hold your bike in place. (Photo C)

Alert the bus operator that you’ll be loading your bicycle on the bus, you’ll need lower the rack by squeezing the center handle (Photo A)

If you’re concerned about the safety of your bicycle, you can lock your front wheel to your bicycle frame—but do not lock your wheel to the bus rack.

Board and pay your fare. We recommend that you sit or stand near the front of the bus to keep an eye on your bike while riding.

When you come to your stop, exit the bus at the front and be sure to tell the driver that you’re removing a bicycle.

To remove your bike, lift and stow the support arm back in its down position and lift your bike off the bus. If there are no other bikes in the rack, squeeze the handle and lift the rack back into its upright position. (Photo D).

Forgot your bike on a bus?

We hope it never happens to you, but this happens sometimes! If someone leaves a bike, it’ll likely end up back at the garage the bus came from and stored in the garage’s Lost & Found. Check our Lost & Found page online to figure out what garage your bus route comes out of and call the next day to see if they have your bike.

Note some routes have their buses come from multiple garages. (This is also true of train lines, and the procedure is the same.) transit/chicago.com/lostandfound

Intro/bikes on buses

Bikes on buses

All CTA buses are equipped with a bike rack on the front of the bus, which has a special lever arm that goes over your front wheel to hold your bike in place while the bus is in motion.
