Please comment on the proposed alternatives, the purpose and need for the project, the proposed topics of evaluation and the potential impacts and mitigation measures to be considered. Comments must be submitted by the close of business on October 27, 2009.

I support the extension of the CTA Red Line using the Union Pacific Rail Road (UPRR)

route. I support the position that the Red Line extension must reach the Altgeld Gardens/

Calumet River area at 130th Street and that every possible engineering design concept

must be examined to ensure the full extension of the Red Line from 95th Street to 130th

Street. This will insure mass transit access to a transit dependent population, south

suburban communities and nearby industries.

Scoping comments may be submitted via mail, e-mail, fax or the project website with attention to: Jeffrey Busby, General Manager, Strategic Planning, Chicago Transit Authority, P.O. Box 7602, Chicago, IL 60680-7602. Please comment on the proposed alternatives, the purpose and need for the project, the proposed topics of evaluation and the potential impacts and mitigation measures to be considered. Comments must be submitted by the close of business on October 27, 2009.

I support the extension of the CTA Red Line using the Union Pacific Rail Road (UPRR)

route. I support the position that the Red Line extension must reach the Altgeld Gardens/
Calumet River area at 130th Street and that every possible engineering design concept
must be examined to ensure the full extension of the Red Line from 95th Street to 130th
Street. This will insure mass transit access to a transit dependant population, south
suburban communities and nearby industries.

Scoping comments may be submitted via mail, e-mail, fax or the project website with attention to: Jeffrey Busby, General Manager, Strategic Planning, Chicago Transit Authority, P.O. Box 7602, Chicago, IL 60680-7602. Please comment on the proposed alternatives, the purpose and need for the project, the proposed topics of evaluation and the potential impacts and mitigation measures to be considered. Comments must be submitted by the close of business on October 27, 2009.

I support the extension of the CTA Red Line using the Union Pacific Rail Road (UPRR)
route. I support the position that the Red Line extension must reach the Altgeld Gardens/
Calumet River area at 130th Street and that every possible engineering design concept
must be examined to ensure the full extension of the Red Line from 95th Street to 130th
Street. This will insure mass transit access to a transit dependent population, south
suburban communities and nearby industries. Pamela Fluellen

Please comment on the proposed alternatives, the purpose and need for the project, the proposed topics of evaluation and the potential impacts and mitigation measures to be considered. Comments must be submitted by the close of business on October 27, 2009.

I support the extension of the CTA Red Line using the Union Pacific Rail Road (UPRR)

route. I support the position that the Red Line extension must reach the Altgeld Gardens/

Calumet River area at 130th Street and that every possible engineering design concept

must be examined to ensure the full extension of the Red Line from 95th Street to 130th

Street. This will insure mass transit access to a transit dependent population, south

suburban communities and nearby industries.

Red Line Extension

Connecting 95th Street Station to 130th Street

RS-146

The purpose of the scoping process is to identify public and agency concerns early in the environmental process, define the issues and alternatives that will be examined in the Environmental Impact Statement (EIS) and facilitate an efficient EIS preparation process. Please PRINT.

Please comment on the proposed alternatives, the purpose and need for the project, the proposed topics of evaluation and the potential impacts and mitigation measures to be considered. Comments must be submitted by the close of business on October 27, 2009.

I support the extension of the CTA Red Line using the Union Pacific Rail Road (UPRR)

route. I support the position that the Red Line extension must reach the Altgeld Gardens/

Calumet River area at 130th Street and that every possible engineering design concept

must be examined to ensure the full extension of the Red Line from 95th Street to 130th

Street. This will insure mass transit access to a transit dependent population, south

suburban communities and nearby industries.

route. I support the position that the Red Line extension must reach the Altgeld Gardens/

Calumet River area at 130th Street and that every possible engineering design concept

must be examined to ensure the full extension of the Red Line from 95th Street to 130th

Street. This will insure mass transit access to a transit dependent population, south

suburban communities and nearby industries.

Please comment on the proposed alternatives, the purpose and need for the project, the proposed topics of evaluation and the potential impacts and mitigation measures to be considered. Comments must be submitted by the close of business on October 27, 2009.

I support the extension of the CTA Red Line using the Union Pacific Rail Road (UPRR)
route. I support the position that the Red Line extension must reach the Altgeld Gardens/
Calumet River area at 130th Street and that every possible engineering design concept
must be examined to ensure the full extension of the Red Line from 95th Street to 130th
Street. This will insure mass transit access to a transit dependent population, south
suburban communities and nearby industries.

Scoping comments may be submitted via mail, e-mail, fax or the project website with attention to: Jeffrey Busby, General Manager, Strategic Planning, Chicago Transit Authority, P.O. Please comment on the proposed alternatives, the purpose and need for the project, the proposed topics of evaluation and the potential impacts and mitigation measures to be considered. Comments must be submitted by the close of business on October 27, 2009.

I support the extension of the CTA Red Line using the Union Pacific Rail Road (UPRR)
route. I support the position that the Red Line extension must reach the Altgeld Gardens/
Calumet River area at 130th Street and that every possible engineering design concept
must be examined to ensure the full extension of the Red Line from 95th Street to 130th
Street. This will insure mass transit access to a transit dependent population, south
suburban communities and nearby industries.

Scoping comments may be submitted via mail, e-mail, fax or the project website with attention to: Jeffrey Busby, General Manager, Strategic Planning, Chicago Transit Authority, P.O. Box 7602, Chicago, IL 60680-7602. **Fax:** (312)681-4297, **Email:** RedExtension@transitchicago.com, **Website:** www.transitchicago.com/RedEIS, **Customer Information:** 1-888-YOUR-CTA (1-888-968-7282), **Hearing & Speech Impaired:** 1-888-CTA-TTY1 (1-888-282-6891), **Transit Information:** 836-7000 from any local area code **RTA TTY:** 312-836-4949

Please comment on the proposed alternatives, the purpose and need for the project, the proposed topics of evaluation and the potential impacts and mitigation measures to be considered. Comments must be submitted by the close of business on October 27, 2009.

I support the extension of the CTA Red Line using the Union Pacific Rail Road (UPRR)
route. I support the position that the Red Line extension must reach the Altgeld Gardens/
Calumet River area at 130th Street and that every possible engineering design concept
must be examined to ensure the full extension of the Red Line from 95th Street to 130th
Street. This will insure mass transit access to a transit dependent population, south
suburban communities and nearby industries.

Please comment on the proposed alternatives, the purpose and need for the project, the proposed topics of evaluation and the potential impacts and mitigation measures to be considered. Comments must be submitted by the close of business on October 27, 2009.

The key measure for consideration in this matter is the transit riders: how the CTA can be more user friendly & helpful to those persons who are transit disadvantaged.

Clearly, the Red Line must be extended & available to those with low incomes, without cars or without employment because they are transit disadvantaged.

It is critical for the CTA line to extend to 130th St to insure that young & old have access to Chicago's amenities - the Harold Washington Library, the Millennium Park, the Cultural Center - that are so ~~totally~~ accessible to walking ^{and high income} communities.

It is important for transit to be equitable. This line will help (not completely solve) to mitigate against the glaring transit inequities on Chicago's ^{PR} Southside.

Jeffrey Busby
General Manager, Strategic Planning
Chicago Transit Authority
P.O. Box 7602
Chicago, IL 60680-7602

Dear Mr. Busby:

In response to the *Environmental Impact Statement Scoping Information* regarding *Connecting 95th Street Station to 130th Street*, The Chicago Housing Authority (CHA) would like to express strong support for the Red Line Extension Locally Preferred Alternative.

This alternative extension would improve public transportation and citywide accessibility for residents and workers of the South Side. Particularly, this extension would allow greater public transportation and a Red Line stop near the Altgeld Gardens residential development which is located on the far South Side near the Riverdale community. The 190-acre Altgeld Gardens is comprised of 17 blocks of 225 two-story row houses with 1,953 family units and its full rehabilitation is scheduled to be completed in 2014. The CHA would like to add that the Red Line Extension Locally Preferred Alternative would have a tremendous positive impact for the families living at Altgeld Gardens who would certainly benefit from utilizing this proposed extension.

The CHA looks forward to this Chicago Transit Authority targeted project and hopes that we can be of support throughout the process of the Red Line Extension.

Sincerely,

Lewis A. Jordan
Chief Executive Officer

Even though there was one other option presented at the Sept 22nd Scoping Meeting - can't see the purpose being fulfilled using it or the HRT Alternative route. Your goals as stated on page 11 appears to be more efficiently implemented by the locally proposed Alt. West and South side of the existing track. That being said, What is the distance from the track of property in need of occupancy removal? Where on the time-line would these individuals be contacted? How would these persons be contacted? Who (what division of management) will be responsible for those notifications? Will the Engineers even be aware & take under consideration the ability or inability of homes that structurally could not withstand the building/construction affects (the shifting of landscape) consequently home structures upon opening the rail-traffic.

I think the age of the structures must be taken into consideration not only distance.

I commend you on your objectives - knowing how very much this new system effort is needed and I hope an open and fair Communication Line will continue throughout the Project at

October 30, 2009

Mr. Richard L. Rodriguez, President
Mr. Jeffrey Busby, General Manager, Strategic Planning
Chicago Transit Authority
P.O. Box 7602
Chicago, IL 60680-7602

Dear Messrs. Rodriguez and Busby:

The Department of Environment (DOE) appreciates the opportunity to comment on the proposed extension of the Chicago Transit Authority (CTA) Red and Orange Lines. We are supportive of both projects and the increased service to currently under-supported communities.

Three sections follow; the first is a list that applies to both projects, the second focuses on the Red Line, and the third on the Orange Line.

BOTH PROJECTS

Please evaluate:

- Recycling opportunities at stations and parking areas
- Alternative energy options including solar, solar thermal, wind and more to provide electricity and heating / cooling where needed
- Opportunities to install solar arrays (on rooftops, large expanses, etc.) to return energy to the grid
- Reduction of light pollution through the use of downward-facing lighting
- Compliance with the city's stormwater ordinance, including using bioswales, rain barrels and other methods to reduce the first flush of water into the sewer system
- Native landscapes requiring little to no irrigation
- Green roofs on any facilities
- Bicycle access and parking
- Permeable paving for the Park-N-Ride areas
- Preferred parking for fuel-efficient vehicles
- Charging stations for electric vehicles
- The City's new Soil and Rubble Reuse Intergovernmental Agreement applicability – extensive reuse of materials during demolition and construction could be possible
- Impacts to wildlife or other important natural resources

RED LINE

DOE will be constructing the Ford Calumet Environmental Center, a 38,000 square foot environmental education facility near 130th and Torrence in Chicago. We are supportive of a joint Metra / CTA station at 115th Street and are very interested in the possibility of an intermodal connection between NicTD/South Shore Line and CTA at 130th Street. These joint stations would allow residents from Indiana and the suburbs to easily gain access to our Center. We would also invite discussion around a bus turnaround at the Center for the 130th and Torrence buses or other buses with similar routes.

ORANGE LINE

Of particular concern to DOE are issues relating to neighborhood compatibility and environmental justice, primarily in relation to historical and/or privately owned parcels that may need to be acquired for the project. DOE would also be interested in a detailed evaluation of noise and vibration, including additive effects associated with Midway airport operations, to determine how such issues will affect neighboring properties.

We offer our support and assistance with any of our comments as appropriate. Thank you for the opportunity to comment on these important projects.

Sincerely,

A handwritten signature in black ink, appearing to read 'Suzanne Malec-McKenna', with a long horizontal line extending to the right.

Mr. Jeffrey Busby
 General Manager, Strategic Planning
 Chicago Transit Authority
RedExtension@transitchicago.com
OrangeExtension@transitchicago.com

Dear Mr. Busby:

I am writing in response to your request for comments regarding the environmental reviews that will take place pertinent to the potential expansions of the Red and Orange Lines of the Chicago Transit Authority.

For both projects, the City of Chicago's Department of Streets and Sanitation (DSS) would like the review committee to consider the following comments and concerns regarding the expansions during the environmental review process:

1. The location of any street lights that will need to be removed or relocated as a result of the new lines;
2. An analysis of the affect these elevated concrete supports will have on street level lighting and any steps that will be taken to supplement street lighting in these areas, i.e. CTA-provided lighting on the underside of the elevated line;
3. The location of any public way trees that will need to be removed as a result of the new lines or the construction activity and a replacement strategy for those lost trees;
4. The level of assistance the CTA expects to request from DSS for services such as street "No Parking" postings and the towing of illegally parked vehicles during the construction phase of these projects;
5. The creation of a rodent abatement plan for the affected land which includes required sign-offs by the DSS's Bureau of Rodent Control prior to construction;
6. A plan for the proper storage, removal and recycling of all construction and demolition debris in accordance with all City of Chicago ordinances; and
7. A commitment to having platform level recycling containers and space at street level for the storage of recyclables prior to being separately collected from the garbage.

Thank you for your consideration of these issues

Sincerely,
 (SIGNED)

Dear Mr. Busby:

In response to the *Environmental Impact Statement Scoping Information* regarding *Connecting 95th Street Station to 130th Street*, The Chicago Housing Authority (CHA) would like to express strong support for the Red Line Extension Locally Preferred Alternative.

This alternative extension would improve public transportation and citywide accessibility for residents and workers of the South Side. Particularly, this extension would allow greater public transportation and a Red Line stop near the Altgeld Gardens residential development which is located on the far South Side near the Riverdale community. The 190-acre Altgeld Gardens is comprised of 17 blocks of 225 two-story row houses with 1,953 family units and its full rehabilitation is scheduled to be completed in 2014. The CHA would like to add that the Red Line Extension Locally Preferred Alternative would have a tremendous positive impact for the families living at Altgeld Gardens who would certainly benefit from utilizing this proposed extension.

The CHA looks forward to this Chicago Transit Authority targeted project and hopes that we can be of support throughout the process of the Red Line Extension.

Sincerely,

Lewis A. Jordan
Chief Executive Officer

BUREAU OF PATROL

1 October 2009

TO: Jeffrey Busby
General Manager
Strategic Planning
Chicago Transit Authority

FROM: Mark Harmon
Commanding Officer
Bureau of Patrol Administration

SUBJECT: CTA Extension Projects

Bureau of Patrol is listing the following concerns/issues to be addressed in regards to the Red and Orange line extension projects:

- Federal funding for an overtime initiative similar to the Dan Ryan extension project. Overall security for the project will over burden regular patrol duties. Site and personnel security should be covered separately from day to day operations.
- Remote and somewhat concealed access points and locations pose security issues.
- Additional traffic issues need to be addressed with proposed right of way going to CTA. There will also be additional vehicles being utilized to begin the shuttle service to proposed new destinations.
- More Chicago Police Department members will need to be rail certified with the proximity of the rail system to the designated patrol areas.
- Proposed expansion of the 95th St terminal poses many traffic and security issues. Currently the terminal is one of the busiest rail locations for police service. This would be greatly affected by reduced parking and increased foot and vehicular traffic.

September 28, 2009

Mr. John Paquet
Vice President
Planning and Development
Chicago Transit Authority
567 West Lake Street
Chicago, IL 60661-1498

Dear Mr. Paquet:

We have reviewed the information concerning an Environmental Impact Statement project for the proposed Red Line Extension to serve the South Suburban residents. This project also includes improvements to the 95th Street Station terminal.

The Agency has no objections to the project; however a construction site activity stormwater NPDES permit will be required from the Division of Water Pollution Control. Also, please contact The U. S. Army Corps of Engineers for any permit requirements if there are any stream crossings that require dredge and fill activities in the waterway.

If you have need for an Environmental Review in the future, please submit your information to:
Illinois Environmental Protection Agency, Deputy Director's Office/MC #1,
PO Box 19276, Springfield, Illinois 62794-9276, **ATTN: DiAnne Schuerman**

Subject: Illinois State Police concerns

As we discussed in the Scoping meeting on September 23, 2009. Below is details a few concerns we had and would like them looked at during the preliminary phase:

FIRST RESPONDERS

Will the construction area be easily accessible for First Responders to respond to any type of emergency? With the tracks being elevated, will there be an easy on/off for personnel?

SECURITY

If the Contractor desires additional police officer services of Illinois State Police (ISP), District Chicago, for enforcement, traffic control, and/or security, ISP personnel will, as available, provide police services on a hireback basis. During this time, ISP officers will provide a visible State Police presence, provide general police services and take enforcement action as appropriate in and around the site of the program. We will govern all areas on the expressways or on state owned property. To secure the above, the Contractor would have to sign a binding contract detailing all the specifics with the State of Illinois.

If you should have any questions or need additional information, please do not hesitate to contact me.

Respectfully,

Lieutenant Tony Lupo

From: David Tomzik [David.Tomzik@Pacebus.com]
Sent: Tuesday, October 27, 2009 9:12 AM
To: Red Extension
Subject: Red line EIS scoping comments

Pace scoping comments regarding CTA Red Line Extension Environmental Impact Statement

Thank you for the opportunity to review and comment on the scoping of the Environmental Impact Statement for the Red Line extension. Below are comments regarding the proposed project alternatives and potential environmental impacts relating to the proposed extension between 95th Street Station and 130th Street.

- Pace supports the rail extension of the Red Line from the current terminus at 95th Street Station to 130th Street
- In compliance with the Illinois Auditor General's recommendation to reduce CTA & Pace overlapping service and provide greater suburban market coverage area, Pace intends to restructure various south suburban routes operating on Halsted and King Drive which now serve the Red Line 95th Street Station. Additional planning development and review would be required to determine the most optimal station(s) to serve on either alignment.
- Arterial roadway access to/from the proposed station(s) served by connecting bus services will require further review including issues such as railroad grade crossings, street parking, and intersection improvements to accommodate bus movements.
- Pace requests participation in the planning development and design of the proposed station facilities served by both fixed route and Regional ADA Paratransit services. Design should include sufficient bays to accommodate Pace and CTA bus routes, Regional ADA Paratransit, operator facilities, passenger information as well as bus priority access such as Transit Signal Priority or bus activated signals to allow buses to enter/exit the terminal with minimal congestion.

We look forward to participating in this regional planning process.

- Additional traffic issues need to be addressed with proposed right of way going to CTA. There will also be additional vehicles being utilized to begin the shuttle service to proposed new destinations.
- More Chicago Police Department members will need to be rail certified with the proximity of the rail system to the designated patrol areas.
- Proposed expansion of the 95th St terminal poses many traffic and security issues. Currently the terminal is one of the busiest rail locations for police service. This would be greatly affected by reduced parking and increased foot and vehicular traffic.

Mr. John Paquet
Vice President
Planning and Development
Chicago Transit Authority
567 West Lake Street
Chicago, IL 60661-1498

Dear Mr. Paquet:

We have reviewed the information concerning an Environmental Impact Statement project for the proposed Red Line Extension to serve the South Suburban residents. This project also includes improvements to the 95th Street Station terminal.

The Agency has no objections to the project; however a construction site activity stormwater NPDES permit will be required from the Division of Water Pollution Control. Also, please contact The U. S. Army Corps of Engineers for any permit requirements if there are any stream crossings that require dredge and fill activities in the waterway.

If you have need for an Environmental Review in the future, please submit your information to:
Illinois Environmental Protection Agency, Deputy Director's Office/MC #1,
PO Box 19276, Springfield, Illinois 62794-9276, **ATTN: DiAnne Schuerman**

Sincerely,

Lisa Bonnett
Acting Deputy Director

Subject: Illinois State Police concerns

As we discussed in the Scoping meeting on September 23, 2009. Below is details a few concerns we had and would like them looked at during the preliminary phase:

FIRST RESPONDERS

Will the construction area be easily accessible for First Responders to respond to any type of emergency? With the tracks being elevated, will there be an easy on/off for personnel?

SECURITY

If the Contractor desires additional police officer services of Illinois State Police (ISP), District Chicago, for enforcement, traffic control, and/or security, ISP personnel will, as available, provide police services on a hireback basis. During this time, ISP officers will provide a visible State Police presence, provide general police services and take enforcement action as appropriate in and around the site of the program. We will govern all areas on the expressways or on state owned property. To secure the above, the Contractor would have to sign a binding contract detailing all the specifics with the State of Illinois.

If you should have any questions or need additional information, please do not hesitate to contact me.

Respectfully,

Lieutenant Tony Lupo
District Chicago

Subject: Red line EIS scoping comments

Pace scoping comments regarding CTA Red Line Extension Environmental Impact Statement

Thank you for the opportunity to review and comment on the scoping of the Environmental Impact Statement for the Red Line extension. Below are comments regarding the proposed project alternatives and potential environmental impacts relating to the proposed extension between 95th Street Station and 130th Street.

- Pace supports the rail extension of the Red Line from the current terminus at 95th Street Station to 130th Street
- In compliance with the Illinois Auditor General's recommendation to reduce CTA & Pace overlapping service and provide greater suburban market coverage area, Pace intends to restructure various south suburban routes operating on Halsted and King Drive which now serve the Red Line 95th Street Station. Additional planning development and review would be required to determine the most optimal station(s) to serve on either alignment.
- Arterial roadway access to/from the proposed station(s) served by connecting bus services will require further review including issues such as railroad grade crossings, street parking, and intersection improvements to accommodate bus movements.
- Pace requests participation in the planning development and design of the proposed station facilities served by both fixed route and Regional ADA Paratransit services. Design should include sufficient bays to accommodate Pace and CTA bus routes, Regional ADA Paratransit, operator facilities, passenger information as well as bus priority access such as Transit Signal Priority or bus activated signals to allow buses to enter/exit the terminal with minimal congestion.

We look forward to participating in this regional planning process.

Chicago Transit Authority
P.O. Box 7602
Chicago, IL 60680-7602

Dear Mr. Busby:

Subject: Environmental Impact Statement Scoping for the CTA Red Line Extension

Reference is made to your interagency scoping meeting on September 24, 2009, concerning the subject matter. The Metropolitan Water Reclamation District of Greater Chicago (District) has the following comments for the scoping process:

- Aerial photos of the Locally Preferred Alternative shown at the meeting indicate the proposed alignment running along the Union Pacific Railroad (UPRR) at grade adjacent to District property. The District requires access between the Calumet Water Reclamation Plant to the west of Cottage Grove Avenue and its facilities to the east of Cottage Grove Avenue. District access between the two facilities will have to be modified or reconstructed as part of the project.
- The proposed alternative for the station at the end of the line south of 130th Street is adjacent to District property between 130th Street and 130th Avenue and west of the station. Depending on the location of parking, etc., a request to lease or acquire District property may be required.
- The location for the proposed CTA station north of 130th Street is entirely on District property, some of which may be considered wetland. Also, it appears that the rerouted Cottage Grove Avenue utilizes the District road within the plant boundaries. The District understands that the draft plans are preliminary, but we will have to do a complete evaluation as plans are further developed to determine potential impact on the District.

- We recommend an odor study be conducted early in the environmental review process for impacts on the proposed CTA facilities. The area of greatest concern is the final CTA station along 130th Street, which is directly adjacent to the Calumet Water Reclamation Plant.
- The proposed alignment crosses the District's 17'6"x14'0" Calumet Intercepting Sewer 6 just east of Indiana Avenue. Attached are Sheets 1 and 5 of this contract. This intercepting sewer should be placed on all future Red Line Extension plans.

Questions may be referred to Joe Schuessler, 312-751-3236.

Very truly yours,

A handwritten signature in black ink, appearing to read "Joseph P. Sobanski".
