## Detailed Overview of Scope:

The 95th Terminal Improvement Project will create new South and North terminal buildings at 95th on the Dan Ryan Red Line. The new terminal buildings will create a functional and efficient intermodal facility to enhance bus service and improve pedestrian safety. Scope includes the replacement and expansion of the terminal and platform and the addition of bus and pedestrian bridges. New administrative office space will be built and new bus bays will be provided around the terminal buildings.
## Project Title: 95th Terminal Improvement Program

<table>
<thead>
<tr>
<th>Impact on Customers:</th>
<th>Track closures and weekend station closures during construction. Temporary relocation of certain bus operations to nearby streets during construction phasing.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Benefit to System:</td>
<td>Improved customer circulation and safety by relieving congestion. Improved bus service and improved pedestrian safety.</td>
</tr>
<tr>
<td>Benefit to Community:</td>
<td>Improved pedestrian safety with new pedestrian bridge over 95th Street, longer train platform extending to the new South Terminal Building.</td>
</tr>
<tr>
<td>Impact on Accessibility:</td>
<td>New south and north terminal buildings with improved accessible routes to buses.</td>
</tr>
<tr>
<td>Estimated # of Jobs Created:</td>
<td>3,640 indirect, 762 direct</td>
</tr>
<tr>
<td>Customer Communication Need:</td>
<td>Requires periodic track closures and possible station closures with bus shuttle service. Bus Operations may be relocated to adjacent streets during certain phases of construction.</td>
</tr>
</tbody>
</table>

**Detailed Overview of Scope:** The station will replace the badly deteriorated station that was built in 1923. The station will have multiple entrances/exits and will include the following features:

- Two (2) new 26 foot – 10 car concrete island platforms with full canopies.
- New main station located on the south side of Wilson Ave., new auxiliary entrance/exit at Sunnyside Ave. and a new auxiliary entrance/exit on the north side of Wilson.
- New elevators, escalators, lighting, signage, fare control, security cameras and art work.
- Replace old existing elevated track structure with new track structure to accommodate the new station platform and the necessary infrastructure to support the new track alignment.
### Project Title: Wilson Transfer Station, Track & Structure Reconstruction

<table>

</table>
| Benefit to System:  | • New modern, more spacious and accessible stationhouse with three (3) entrances.  
|                     | • Upgraded track structure infrastructure and signals for more reliable service.  
|                     | • New transfer point between Red and Purple express rail lines. |
| Benefit to Community: | • Modern facility with new system upgrades.  
|                     | • Easy access entrances through three (3) entry points.  
|                     | • Bigger platforms that will accommodate higher capacity for passengers to avoid overcrowding.  
|                     | • Platform canopies to protect customers from elements.  
|                     | • New ADA accessible station. |
| Impact on Accessibility: | Station will be fully accessible upon completion. |
| Estimated # of Jobs Created: | 2,678 indirect, 560 direct |
| Customer Communication Need: | • Construction activity notices will be provided to inform businesses and residents regarding temporary stations and construction impacts (noise, dust, street/alley impacts) throughout the project. |

</tbody>
</table>

**Overview of Scope:** The signal system upgrade will include the following features:

- Removal of all existing signal equipment, cabling, and signal platforms.
- Design & install new platforms, cabling, cable support brackets, and signal equipment.
- Communication network design, configuration, installation, and commissioning.
<table>
<thead>
<tr>
<th>Impact on Customers:</th>
<th>54 hour line cut to cut over new signal system.</th>
</tr>
</thead>
</table>
| Benefit to System:  | • Decreased headways  
                     • More reliable equipment  
                     • More robust signal network  
                     • Better diagnostic abilities  
                     • More reliable track circuit indications  
                     • Added loss of shunt detection system  
                     • Optimized curve speeds (potentially reduce run times) |
| Benefit to Community: | • Maximizing number of trains allowed in the corridor.  
                           • Less customer inconvenience due to signal system malfunction. |
| Impact on Accessibility: | None |
| Estimated # of Jobs Created: | 650 indirect, 136 direct |
| Customer Communication Need: | • Construction activity notices will be provided to inform businesses and residents regarding line cut and construction impacts (noise, dust, street/alley impacts) throughout the project. |

| **Construction Manager / Owners Representative:** | STV                                                                                                                                  |

**Detailed Overview of Scope:**

The Illinois Medical District Rehabilitation Project will rehabilitate the Damen and Paulina stationhouses and concourses through structural reinforcements and upgraded exterior envelopes & interior improvements. The project will reconstruct and expand the Ogden stationhouse providing new upgraded electrical service and elevator access to the platform as well as reinforced structural components. Platform restorations and improvements will also be incorporated. All three station entrances will be ADA compliant and will incorporate lighting improvements, communication system improvements and signage upgrades.
### Impact on Customers:
Station will remain open at all times. Temporary Station Entrance closures will occur and access to portions of the platform will be limited during phased construction work. ADA accessibility will be maintained at either the Paulina Stationhouse or Damen Stationhouse during all phases of construction.
- 50 maximum nightly single track occurrences.
- 5 maximum weekend single track occurrences.
- Partial platform closures.

### Benefit to System:
Improved customer circulation. Provides accessibility to customers with disabilities at all 3 entrances of IMD Station which maintains the highest ridership on the Congress Branch.

### Benefit to Community:
Improved aesthetics and pedestrian safety with new metal panel stationhouse exteriors, stainless steel stationhouse interior panels & new stationhouse storefronts. Upgraded LED lighting, upgraded communication systems and new signage.

### Impact on Accessibility:
New elevator installation at Ogden Stationhouse. Concrete resurfacing of Damen & Paulina Concourses.

### Estimated # of Jobs Created:
299 indirect, 63 direct

### Customer Communication Need:
Construction activity notices will be needed to alert customers, businesses and residents to temporary entrance closures, weekend and night work occurrences. Extensive communication will be required for weekend closures and for extended partial platform closures.

### Detailed Overview of Scope:

Rehabilitation of existing buildings and building envelopes to a state of good repair at East Lake, Milwaukee, and Illinois. Scope of work includes replacement of roof, tuck-pointing, hazardous material abatement, structural repairs and improvements, plumbing and mechanical repairs and improvements, and electrical repairs and improvements.

Replace existing AC/DC conversion equipment at all locations and getaway cables at East Lake.

Part of the scope of this project includes CTA purchasing 10 East Lake from ComEd.
