### Red and Purple Modernization Phase One Project

# **Construction in Your Alley**

When construction in your alley blocks access to your garage or impacts your regular garbage and recycling pick-up, the contractor is responsible for providing alternative parking, and garbage and recycling pick-up.

#### **Alternative Parking**

For residents with garages that will be temporarily blocked by construction, the Walsh-Fluor Design-Build Team will provide alternative, secure parking. For each individual parking space blocked by construction, you will receive an alternative parking spot.

Residents who will require alternative parking will be given two weeks' advance notice, alternative parking information and a parking pass.

Potential alternative parking spaces that have been identified to date and are shown on the map.

### Garbage & Recycling Pick-Up

For residents whose garbage and recycling pick-up will be impacted by construction in their alleys, Walsh-Fluor will arrange for garbage and recycling pick-up. Their will be no interruption of services. Construction crews will be responsible for moving garbage and recycling bins for collection and returning them.

The addresses listed are potential alternative parking locations identified at this time and are subject to change.

## LBMM Potential Alternative Parking Locations
