

Learn how your small business firm could effectively participate on CTA contracts

Participants will learn from key CTA personnel and industry leaders about topics that focus on procuring business opportunities, managing projects, risk management, payroll and successfully closing out projects, among other areas. Participants will also learn more information about becoming Disadvantaged Business Enterprise (DBE) Certified with the CTA.

Upon completion of the program, participants will have the option to receive OSHA training and CPR training hosted by CTA.

Participants will also receive a certificate of completion and have the opportunity to meet with CTA prime contractors.

Participant must attend a minimum of six classes in order to receive a certificate of completion.

Does your firm provide a construction related service?

Have you worked on a construction project in the past?

Are you looking to take your business to the next level?
